

Tickle Time

Gear 4

One switch does one thing (press and release)

I love being tickled! When I press my switch start tickling me straight away very lightly on my sides. Tickle me for four seconds and then stop! You can tickle me again if I ask for it

What you'll need

You'll need to record a "Tickle Me" message onto a BIGmack talking switch.

[See page 2](#)
Plug one of my switches into the BIGmack and position my switch so I can use it.
